STEAM and HEALTHY BEHAVIORS

FREE Resources & Activities for your Program

K-8 Expanded Learning Programs Clever Crazes for Kids

This workshop will be taking place in a computer lab so you can see, experience and play within the worlds just as your participants do. Once you experience Clever Crazes you will want to get started at your site too! With Clever Crazes...every week there is something to work towards! **Great opportunities to win prizes and money for your program and supplies too.** Come learn more!

Clever Crazes for Kids® academic areas of focus ~ 10 "Worlds"

Clever Crazes for Kids® academic areas of focus ~ 10 “Worlds”

1. You and Your Insides

In this world, your students will examine the human body, including skeletal, digestive, respiratory, circulatory, reproductive, and nervous systems. Kids will also learn about growth and development taking place through life cycles.

2. You and Outer Space

Your students will explore our solar system, our universe and other galaxies. Some special points of focus are Earth, the sun and moon, and other objects in the sky.

3. You and Our Home Planet

Here, students will learn about Earth's structure, the properties of Earth's materials and our weather. In this world, relationships between populations, resources, and environments are explored.

4. You and How Things Work

In this world, students learn about physics, chemistry, and associated topics including heat, light, and sound, as well as electricity and magnetism. Your students will also explore the properties and characteristics of matter.

5. You the Time Traveler

This world includes history and social studies. Students will learn how individual people and cultures of the past have helped shape our world today. Topics of geography, populations, and U.S. history will be covered.

6. You and Your Money

This curriculum will have students learn about the concepts of supply and demand through the lens of microeconomics. They will learn how money is earned, spent, saved, and donated to help others

7. You and Biodiversity

Students will learn about the diversity of life on Earth through exploration of living things, their life cycles, and the environments they inhabit. Kids will explore how living and non-living things work together in a healthy ecosystem.

8. You the Citizen

This world will teach kids about the U.S. government and how it functions including the values and principles of democracy, our U.S. Constitution, and the meaning of citizenship.

9. You the Athlete

Students will learn how aerobic activity stimulates brain activity and enhances memory. Kids will be able to identify healthy behaviors such as “getting fit,” “eating smart,” and “staying healthy,” and “being safe.” Topics range from causes of disease and consequences of drug abuse to the physiology of nutrition. In this world, students will also learn about ethics, what bullying is, appropriate social behavior, and how to be a friend.

10. You and the World of Art

Students will learn about visual arts, dance, and music and how these various arts interact with aspects of their lives and expand their critical thinking skills.
